Certaines situations familiales sont-elles défavorables aux enfants ?  
*Questioning the detrimental impact of specific family contexts on children*

# Who Helps Single Mothers in Nairobi?

## The Role of Kin Support

Shelley Clark, McGill University

Sangeetha Madhavan, University of Maryland

Cassandra Cotton, McGill University

Donatien Beguy, APHRC

Caroline Kabiru, APHRC

# Motivation

- ▶ In SSA, kin play an important role in child care, in general, and in care for foster children and orphans, in particular
- ▶ To date, there are few studies on kin support of single mothers in SSA
- ▶ This is surprising because single motherhood is common in SSA
  - ❖ In Kenya 60% of women will become single mothers

# Research Questions

- 1) How large and strong are the kinship networks of single mothers?
- 2) What predicts transfers of financial resources and child care from extended kin to single mothers?

# 1) How large and strong are the kinship networks of single mothers?

## ▶ Large and Strong

- High expectations of assistance and reciprocity
- Strong patrilineal/matrilineal kin ties and identities
- Emphasis on extended kin rather than nuclear families

## ▶ Small and Weak

- Less involvement of extended kin in spousal selection
- Greater reliance on “less preferred” kin to care for orphans
  - More maternal than paternal kin
  - More grandparents than aunts or uncles

## 2) What predicts transfers of financial resources and child care from extended kin to single mothers?

### Structural

- ▶ Need among mother's = more support
- ▶ Greater kin's ability = more support

### Cultural

- ▶ Ethnicity
- ▶ Type of kin
  - Generational (grandparents, aunts/ uncles, siblings)
  - Gender
  - Paternal vs. Maternal

# Study Site

- ▶ ***Korogocho*** is a Swahili term meaning crowded shoulder to shoulder.
- ▶ The slum is home to ~31,000 residents and is characterized by abject poverty and lack of adequate access to necessary amenities.
- ▶ APHRC has been running a Demographic Surveillance System in this community since 2002.

# Sample

- ▶ 462 single (i.e. not currently married or cohabiting) women with at least one child under age 7
- ▶ 5,344 kin members, including the child's siblings, aunts, uncles, grandparents, and the child's biological father
- ▶ 3,453 *potential* kin, which excludes those age  $\leq 7$ , deceased, or with unknown survival status

# Measures - Dependent Variables

- ▶ Financial Support: *“In the last month, has [kin member’s name] provided any financial or in-kind support for you?”*
  - Contributions to household expenses
  - Monetary or in-kind support for focal child
  
- ▶ Child Care Support: *“In the last month, has [kin member’s name] assisted you with child care in any way?”*
  - feeding, bathing, playing with or reading to the child, providing instruction or discipline

# Measures of Size and Strength

## ▶ Size

- Average # of kin who provide support
- “Lone mothers” or “many helping hands”

## ▶ Strength

- Proportion of supportive kin
- Dependence on preferred kin

# Measures—Structural and Cultural Factors

## Structural Factors

### ▶ Mother's Needs

- Age
- Relationship with child's father
- Education
- Employment status
- HH income
- Wealth quintile
- Number of children < 7

### ▶ Kin's Ability

- Age
- Proximity to child
- Employment status
- Education

## Cultural Factors

### ▶ Mother's Ethnicity

### ▶ Relationship to child

- Bio. Father
- Brothers and Sisters
- Mat. Uncles and Aunts
- Mat. Grandmother and Grandfather
- Pat. Uncles and Aunts
- Pat. Grandmother and Grandfather

# Models - Logistic Random-Effects

$$\log \left( \frac{P_{ij}}{1 - P_{ij}} \right) = MC_j \beta'_1 + KC_{ij} \beta'_2 + Kin_{ij} \beta'_3 + Size_j \beta'_4 + \alpha_j + u_{ij}$$

*MC* = Mother (i) characteristics (Level 1)

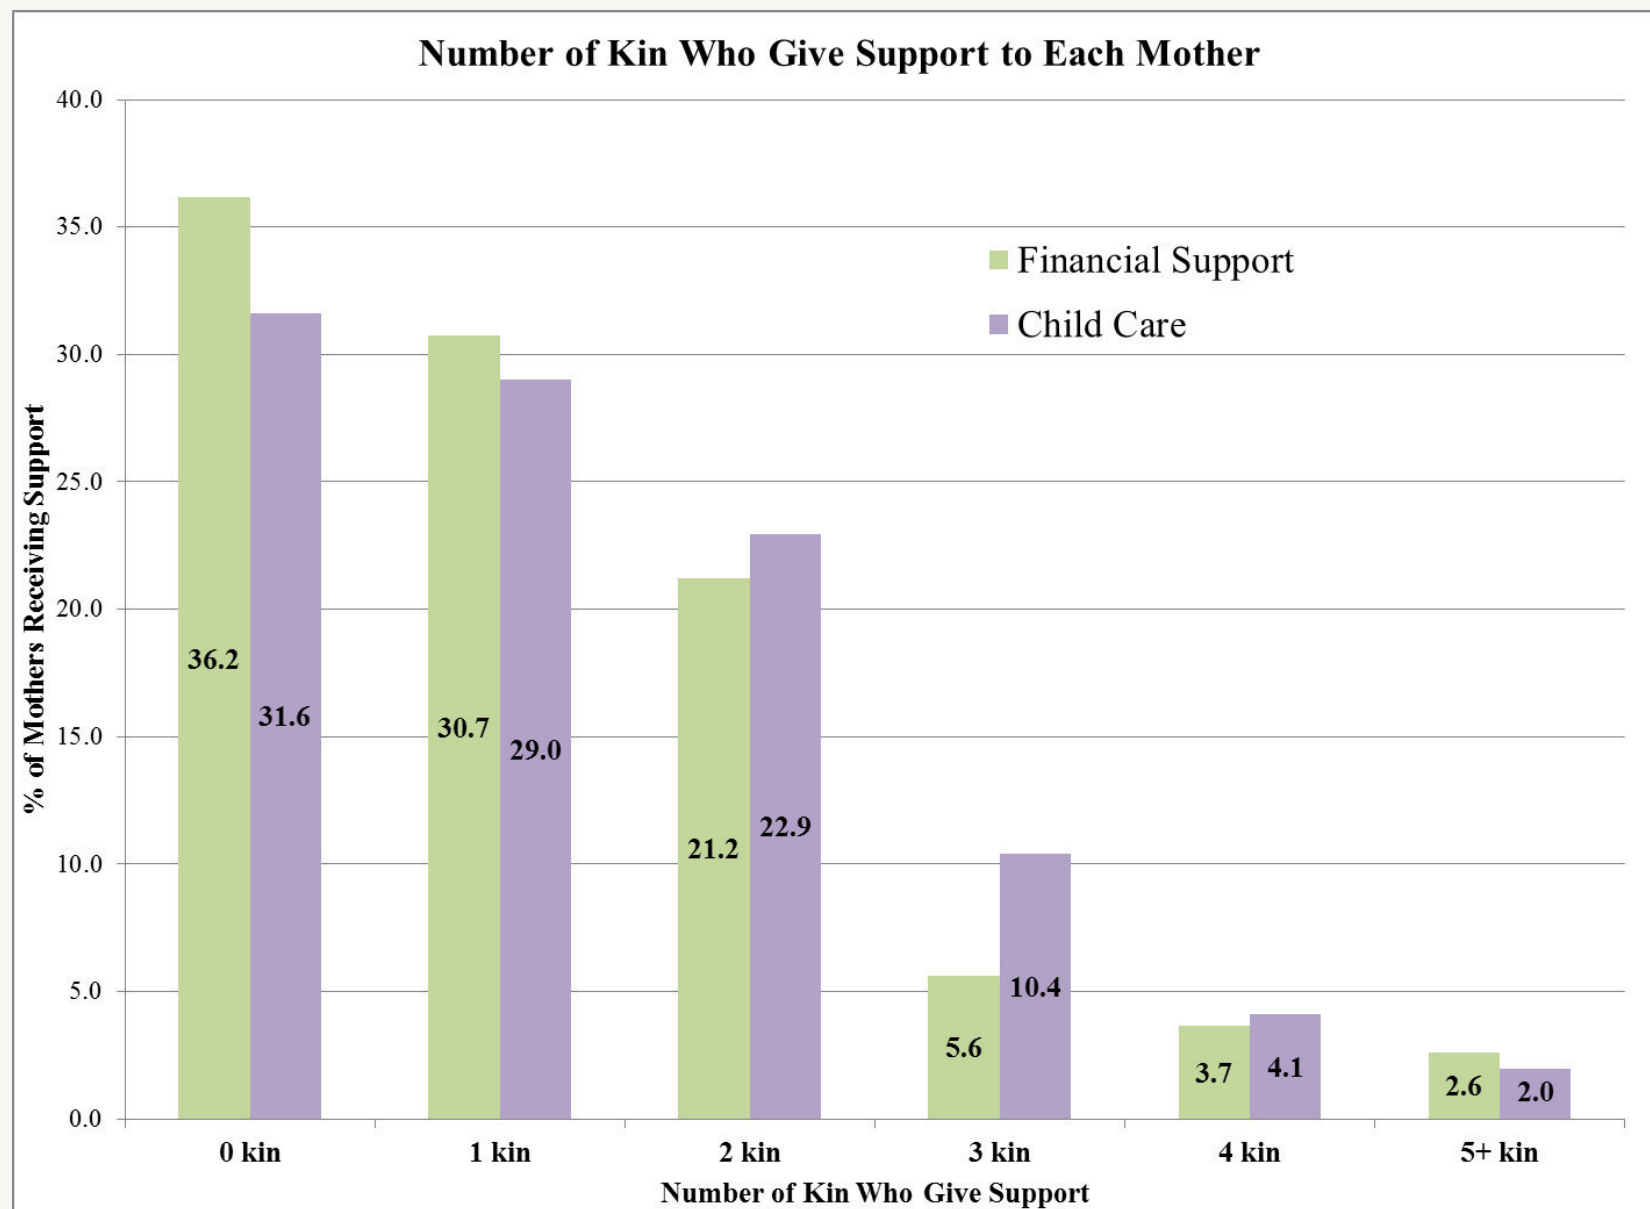

*KC* = Kin (j) characteristics (Level 2)

*Kin* = Relationship to child

*Size* = Size of potential kin network

1) How large and strong are the kinship networks of single mothers?

# How Large are the Kinship Networks of Single Mothers?

# How Strong are Kin Networks?

## Financial Support

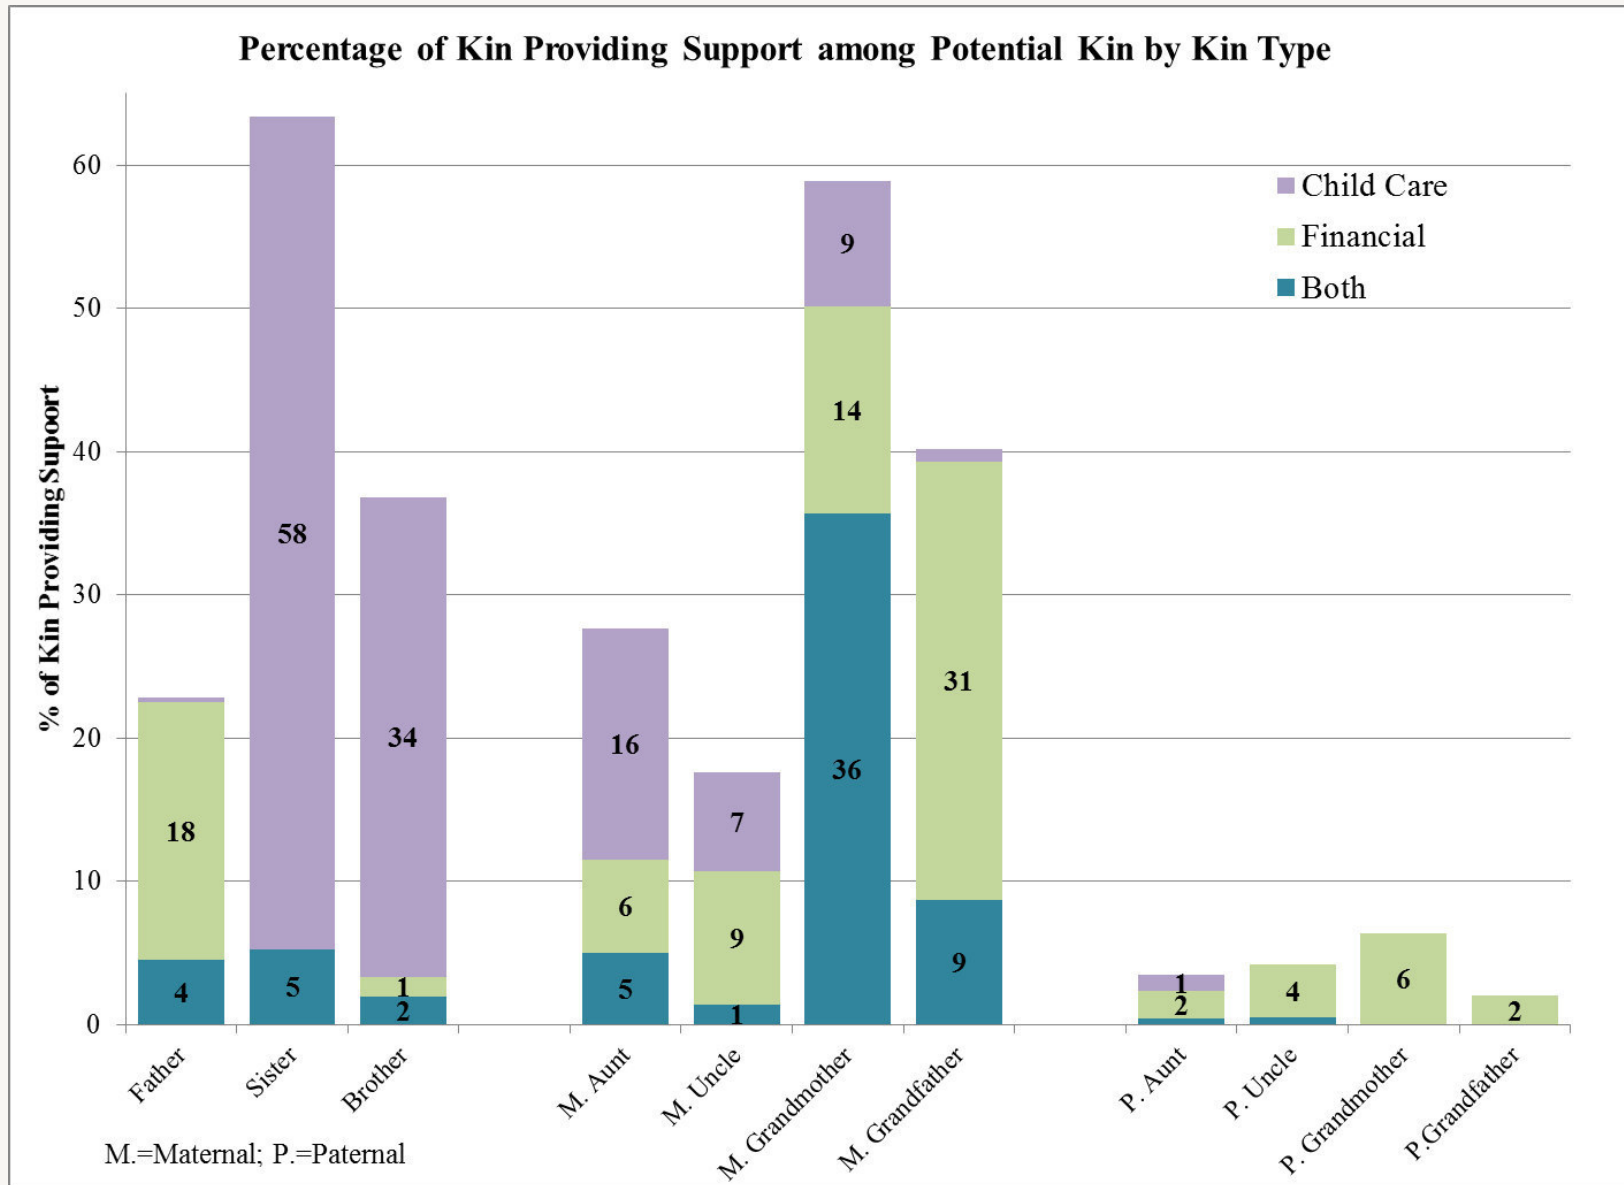

■ Financial Support   ■ No Support

## Child Care

■ Child Care   ■ No Support

# Which Kin are Most Likely to Support Single Mothers?

2) What predicts transfers of financial resources and child care from extended kin to single mothers?

# Financial Support- Significant Predictors

## Structural Factors

### ▶ Mother's Needs

- Younger mothers (<25)
- Never married or living with child's father
- Not working
- Living in poor hh (income <5,000 KSH)

### ▶ Kin's Ability

- Age (30-39)
- Living in HH
- Employed
- Completed secondary school

## Cultural Factors

### ▶ Ethnicity (no sig. differences)

### ▶ Relationship to child

- Mat. grandmothers provide most financial support

### ▶ Gender

- Mat. grandmothers twice as likely as mat. grandfathers
- No sig. differences
  - brothers vs. sisters
  - uncles vs. aunts

### ▶ Lineage

- No sig. differences
  - mat. and pat. grandmothers or grandfathers
  - mat. and pat. uncles or aunts

# Child Care - Significant Predictors

## Structural Factors

- ▶ **Mother's Needs**
  - Younger mothers (<25)
  - Not working (unexpected)
- ▶ **Kin's Ability**
  - Living in HH (huge effects)
  - Employed
  - Some primary school

## Cultural Factors

- ▶ **Ethnicity (no sig. differences)**
- ▶ **Relationship to child**
  - Grandmothers and sisters provide the most child care
- ▶ **Gender (Big differences)**
  - Grandmothers > grandfathers
  - Sisters > brothers
  - Aunts > uncles
- ▶ **Lineage**
  - No paternal kin included

# Conclusions - Size and Strength of Networks

## ► Size

- Small active kin networks (1.2 financial & 1.4 child care)
- 18% of single mothers receive neither financial or child care support

## ► Strength

- Less than 18% of kin provide child care and less than 16% provide financial support
- Single mothers rely heavily on less preferred kin

# Conclusions - Structural vs. Cultural Factors

## ▶ Structural Factors

- More significant for financial support
- Yet, matters less for child care

## ▶ Cultural Factors

- Gender is more important for child care, but less for financial transfers
- Family Lineage does not matter for financial support

# What Else Can Support Single Mother?

- ▶ Create employment opportunities and vocational training programs
- ▶ Encourage unmarried adolescent mothers to stay in school
- ▶ Increase maternal and child services for single mothers
- ▶ Provide high quality and affordable day care
